INTRODUCTION

WHAT IS AN INVESTMENT?

An investment is an asset or item acquired with the goal of generating income or appreciation. Appreciation refers to an increase in the value of an asset over time. When an individual purchases a good as an investment, the intent is not to consume the good but rather to use it in the future to create wealth.

An investment always concerns the outlay of some resource today—time, effort, money, or an asset—in hopes of a greater payoff in the future than what was originally put in. For example, an investor may purchase a monetary asset now with the idea that the asset will provide income in the future or will later be sold at a higher price for a profit.

KEY TAKEAWAYS

1. An investment involves putting capital to use today in order to increase its value over time.
2. An investment requires putting capital to work, in the form of time, money, effort, etc., in hopes of a greater payoff in the future than what was originally put in.
3. An investment can refer to any medium or mechanism used for generating future income, including bonds, stocks, real estate property, or alternative investments.
4. Investments usually do not come with guarantees of appreciation; it is possible to end up with less money than with what you started.
5. Investments can be diversified to reduce risk, though this may reduce the amount of earning potential.

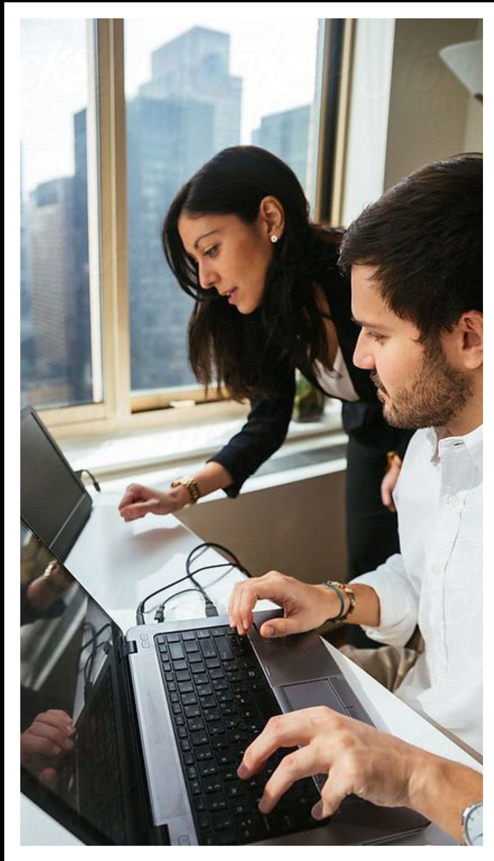
Our principles and ambitions

We Approach Sustainability From Three Perspectives: An Asset Owner, An Asset Manager, And As A Company In Our Own Right



While our responsibilities and obligations in each of these three roles may differ, as we discuss below, our approach in all three is united by a common set of principles and ambitions, set out in the box at the bottom of the page.

We serve as an asset owner on behalf of Prudential With-Profits policyholders, and our pensions and annuity customers. This means we make decisions about how to allocate money to different asset classes and which asset manager should manage our money.
We also have the important responsibility of deciding the financial outcomes we want our asset managers to deliver for us, and the sustainability considerations we require them to apply.

For example, if we think that a certain industry does not have a sustainable future, we may require that the asset manager does not invest in that industry. Our responsibility as an asset owner is to create the best customer outcome in terms of general well-being in line with our fiduciary duty, taking into consideration financial security. We also invest as an asset manager on behalf of individual savers and asset owner clients. As at 31 December 2020, we manage over £233.4 billion for external clients and £133.8 billion on behalf of our internal client.

As an asset manager, we must aim to deliver the financial outcomes and any sustainability requirements set out in the objectives of each of our mutual funds, or in the mandates we receive from institutional clients. Sometimes there may be differences in the sustainability criteria that external clients mandate, and in turn these may differ from the requirements of our internal client. While our values of care and integrity inform all our sustainability work, the asset manager and asset owner are separately regulated businesses with independent Boards and governance processes, and their policies may diverge on occasion.

Sustainability principles and ambitions across our business

Our Sustainability Commitments, Principles And Ambitions Apply Across The Investments We Make As An Asset Manager And Asset Owner, And To Our Own Business Operations

We aim to: be relevant, innovative and accessible; meet customer demand for sustainability and impact solutions; communicate clearly about our products, policies, processes and potential outcomes.

Capability enabled

We will use: world class people, research and proprietary tools and data to understand ESG risks and identify opportunities across all asset classes; our influence as a leading active investor to advocate for sustainable performance; our financial strength to make investments which create positive change.

Sustainably delivered

We will do this with: an inclusive, accountable culture focused on our purpose and our values of care and integrity; sustainability embedded in all we do, from customer service to risk management.

Our sustainability principles:

- We will consider sustainability and ESG factors when determining our corporate strategy and new business initiatives.
- We will embed sustainability considerations throughout our business.
- We aspire to be a thought leader, to innovate, and to advance understanding of sustainability issues.
- We believe in active asset ownership and management which encourages companies to transition towards a sustainable future.
- We consider the interests of all our stakeholders and ensure our views on sustainability are consistent with our longterm approach.
- We will manage our businesses to the same principles of acting responsibly that we hold our investee companies to account on.
- We review our sustainability thinking regularly in order to align with scientific and technological improvements, and changes in the global economy, ethics and consumer preferences.
- We aim to use our influence as a global investor and asset owner to drive positive change in sustainability policy and corporate standards.

Our Approach to ESG and Responsible Investing

We believe markets to be largely efficient and strive to provide systematic exposure to certain risk-based and behaviorally driven factors that can be combined intelligently to deliver results for investors.

Our ongoing investment in the research and design of our investment strategies, including ESG-related approaches, seeks to ensure style and returns consistency, while continually evaluating new data, statistics, investment ideas, and quantitative methods.
We have a long history of accommodating client-specific requests and exclusions of certain securities from an investment universe, such as those deemed socially or environmentally undesirable, or operating in regions where human rights abuses are prevalent.
